SUMMARY:

Front-End Developer skilled in React, GSAP, and creating responsive, user-friendly web applications, eager to apply knowledge and grow in the tech industry**.**

TECHNICAL SKILLS:

- **Web Technologies -** HTML5, CSS3, JavaScript (ES6+)
- **Frameworks & Libraries -** React, GSAP, Tailwind CSS, Bootstrap
- **Version Control -** Git, GitHub

Projects:

{LINK} Weather Forecast App - Front-End and API Data Fetching.

- **Technologies**: JavaScript, HTML, CSS, Bootstrap.
- **Description**: A weather app that allows users to search for any city or use their current location to view detailed weather data and forecasts.
- **Key Features**:
  - **City Search & Current Location**: Fetches weather by city or GPS.
  - **Today's Highlights**: Shows air quality, wind speed, and visibility.
  - **5-Day Forecast**: Provides updates every 3 hours for temperature and wind.
  - **Unit Conversion**: Switch between Celsius/Fahrenheit and km/miles.

{LINK} Math Notes App - Front-End

- **Technologies:** JavaScript, HTML, CSS, Canvas
- **Description**: An app with two pages: a basic calculator for math operations and a digital canvas for taking and saving notes.
- **Key Features:**
  - **Basic Calculator**: Simple interface for performing arithmetic operations.
  - **Digital Canvas**: Interactive space for writing and drawing notes using HTML5 Canvas.
  - **Save & Load Notes**: Save notes to local storage and reload them as needed.
  - **Export Options**: Export notes from the canvas as images.

{LINK} Password Manager - Front-End

- **Technologies:** JavaScript, HTML, CSS, Local Storage.
- **Description**: A front-end application designed for securely managing passwords. Users can generate new passwords, store them locally, and easily access them as needed.
- **Key Features:**
  - **Password Generation**: Create strong, random passwords with customizable options.
  - **Local Storage**: Save and retrieve passwords securely using the browser's local storage.
  - **User Interface**: Simple and intuitive interface for managing and accessing stored passwords.
  - **Data Security**: Encrypt and handle passwords securely within the local storage.
